

Experiment-1

1) Aim

- Responsive Banking UI with Deposit/Withdrawal Buttons and Balance Display

2) Objective

- Design a visually appealing and responsive banking user interface using only HTML and CSS. This helps you practice modern layout techniques and styling without adding interactivity (no JavaScript).

3) Procedure / Algorithm

- Create a banking interface that includes:
- A **balance display** section (e.g., a card or highlighted box)
- A **Deposit** button
- A **Withdraw** button
- The UI should:
- Be **centered** on the page
- Use **proper spacing and alignment** for a clean, professional look

5) Program code->

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
<meta charset="UTF-8">
```

```
<title>Responsive Banking UI</title>

```

```
  box-sizing: border-box;
```

```
}
```

```
body {
```

```
  font-family: 'Segoe UI', sans-serif;
```

```
  margin: 0;
```

```
  padding: 0;
```

```
  background: #e6f2ff;
